RE: 13.27

This bull is really special. He blends the best carcass genetics in both colors of Angus. Calving ease with above average growth, good docility, and opportunities for major value-added Prime Premiums. This bull raises the bar on Prime Quality Grade being one of the highest marbling EPD's in the Red Angus breed. His dam produced the top marbling EPD Red Angus in the entire database in 2024. The top 1% for ProS, GM, Marb, and CW. The top 10% for HB, CED, ADG, CEM, STAY, and REA. He is black hided, but carries the red gene.

THIS BULL IS A HIGH END, SUPERIOR PROSPECT.
